BOSTON—Two field service employees here recently celebrated their 10th anniversary with Tek.

They are Tom Rocheleau, whose anniversary date is October 20, and Gay Woster, November 17. Cake and coffee were served

to mark both occasions.

Tom, according to Terry Davis (Boston SC manager), is one of the "resident experts" on television gear. He also maintains an extensive product profile from Analytical Products and is an active participant in the Service Center's improvements.

Gay has been with the Boston office his entire 10 years. His list of accomplishments is too long to relate in *Tekweek*, Tom noted. As for Gay, he is looking forward to 10 more years like the past 10 good years.
