

vintageTEK MUSEUM

Instrument Library

The vintageTEK museum has a library of instruments for students to "check out" for their projects and educational activities.

To borrow instruments you must be a student 10 years or older (minors need a parent or guardian's signature). You also need to have an identified project or education purpose requiring these instruments and the necessary skills to use the instruments properly (if you don't have the skills, we would be happy to assist you).

Our instrument library consists of these instruments:

- 15 MHz to 350 MHz Dual Channel Oscilloscopes with 10X probes (T922, 465, 475, and 485)
- CDC250 175 MHz Counter
- CDM250 Digital Multi-Meters (DMM)
- CFG250 2 MHz Function Generators
- CMC251 1.3 GHz Frequency Counters
- Pro-S-Lab Breadboard with Power Supply
- Elenco XP-660 Triple Power Supply (older students only)

You must fill out and sign our loan agreement in order to borrow instruments.

For more information including the loan agreement visit vintagetek.org/instrument-library/

vintageTEK org is a 501(c)(3) charitable, educational and scientific museum founded to commemorate the early history of Tektronix, Inc and its role in spawning approximately 300 high technology companies in the 'Silicon Forest' - i.e. the four county, two state metropolitan area of Portland, Oregon. Our mission is to encourage the next generation of engineers by sharing this knowledge and history and supporting STEM programs in our local community.
