

Tektronix UK participates in two British instrument shows

TEKTRONIX UK BOOTH at the Electronics, Instruments, Controls and Components Exhibition and Convention in Manchester during October featured the new portable 422 and 453 oscillo-

scopes which attracted visitors at the show. The British publication, *Electronics Weekly*, called attention to the portable scopes in its October 6 issue.

New 422, 453 scopes attract UK visitors

Tektronix UK Ltd. had impressive displays in October at the Electronics, Instru-

ments, Controls and Components Exhibition and Convention in Manchester and the Medical Electronic and Instrumentation Exhibition at Brighton.

The *Electronics Weekly*, describing the exhibition in Manchester in its October 6

issue, said:

"Tektronix exhibit which attracted most notice was the new type 422 and 453 oscilloscopes. In a small space they make available many of the performance features of the biggest Tektronix models."
