

*Tektronix takes pleasure in announcing...*

...THE COMPLETE OCCUPANCY OF ITS NEW PLANT, located in the green, rolling Oregon countryside, approximately six miles west of Portland. Its increased space and facilities are designed for maximum efficiency, to provide you with faster and more complete services than heretofore possible.

This expansion was necessitated and made possible mainly by two things. First, the foresight of our original customers in "taking a chance" on this new type oscilloscope, and secondly, by the wonderful loyalty of these customers during the subsequent five years of operation.

Of ten of the largest electronic development and manufacturing com-

panies in the country who have our products, nine of them have re-ordered at least thirty times, and five have considerably more than one hundred instruments each. Various government research and development centers in the country match or surpass this record.

We wish to take this opportunity to thank all those who have made this progress possible, and to reaffirm our position of "serving Tektronix customers with products and policies that are unexcelled in the electronics industry and limited only by the current state of the art."

For information on Tektronix products, do not hesitate to contact us directly, or through nearest branch office or representative.

**TEKTRONIX, Inc.** P. O. Box 831, Portland 7, Oregon . . . Located at the Intersection of Barnes Road and the Sunset Highway
