

January 10-year Tekers reach 24, highest total to date

Betty Bohall

Joe Jameson

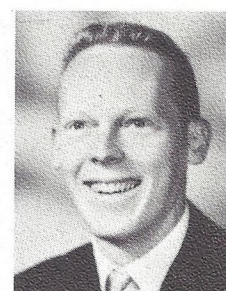

Salme Soot

Mary Breazile

Marie Jungels

Paul Magnusson

Evelyn Meyer

Marlyn Wolever

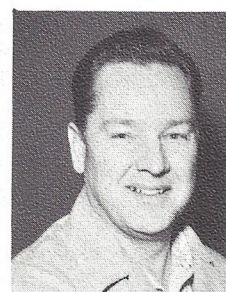

Laine Pettai

William Yerkes

Violet Mills

Robert Sheets

The first month of the new year marked the largest number of Tektronix employees ever to receive service awards for 10 years with the company.

A total of 24 persons were awarded pins or tie clasps last month, topping the previous record of 18 set in August 1964. Last year, December had 15 10-year Tekers and November had 17.

January's number represented a good

cross-section of the company, ranging from Central Staff Services to US Marketing Field Offices.

Those receiving awards during the first half of January are pictured above. They are:

Betty Ann Bohall (Plastic Production Engineering) and **Joe Jameson** (Cost Services), January 3; **Salme Soot** (Plant 4 Component Selection), January 6; **Mary**

Breazile (Plant 4 Assembly), January 9; **Marie Joyce Jungels** (Plant 2 Finals) and **Marlyn Wolever** (Plant 2 Assembly), January 11.

Laine Pettai (Manufacturing Engineering QA), **William Yerkes** (Plant 2 Test unit manager), January 16; **Violet Mills** (CMS Assembly) and **Robert Sheets** (Special Products), January 18.

Photos and names of those receiving awards during the last half of January will appear in the next issue of Tekweek.

With Tektronix reaching its 20th anniversary, Tekweek will also feature employees as they attain 20 years of service with the company.
