

*ON THE COVER: A skylighted central mall is a feature of Tek's Clark County manufacturing facility (Building CI), now under construction in east Clark County, Washington, at 164th Ave. and Mill Plain Blvd. The two-story structure, future home for much of the Instrument Division, has most of its exterior "skin" in place (top photo). Metal wall supports (bottom left) are accented by a temporary reflecting puddle in CI's central mall. Meanwhile, about a mile south of CI, Hewlett-Packard's new building is taking shape (bottom right).*
