

"Without Jack, we never would have started. I didn't know anything about the business side of things."

- Howard Vollum, referring to the start of Tektronix in 1946. Oral History Interview conducted with Jim Castles, April 20, 1984. Full transcript at vintagetek.org.

Tektronix' First Home at 7th and SE Hawthorne in Portland 1947 - 1951

1953

Note the wing of Jack's plane

The Sunset Plant, Tek's second home on Highway 26 on the west side of Portland

1958

Tektronix in Beaverton 1969

Tektronix in Beaverton 1980

The unbuilt, future home of Tektronix in Beaverton, over the wing of Jack's plane in 1956.

Material prepared and contributed by the VintageTek Museum.

VintageTek is a charitable, educational and scientific museum founded to commemorate the early history of Tektronix. The museum and website are dedicated to displaying Tektronix products which enabled generations to create the future and in memory of those employees contributing to this legacy. It is located on the Tektronix campus in Beaverton OR.

Our mission is to encourage the next generation to pursue careers in science, engineering and technology by sharing this knowledge and history and supporting educational programs in our community. vintagetek.org
